

## How to "Be A Solution to Stormwater Pollution"

You can be a solution to water pollution by participating in community activities or workshops and bring what you learn back to your community. Try a few of these tips:

### YARD CARE

- Keep leaves & grass out of streets, drainage ditches, storm drains and creeks.
- Compost yard clippings & leaves or bag them for curbside pickup.
- Do not apply fertilizer before rain.

### AUTOMOTIVE CARE

- Regularly tune up your car and fix any leaks.
- Collect and recycle motor oil, oil filters and other automobile fluids at vehicle service centers or parts stores.
- If you have a spill when changing vehicle fluids, use kitty litter or sawdust to absorb the spill, bag it and throw it in the trash.

### HOUSEHOLD HAZARDOUS WASTES

Improperly disposing of household hazardous wastes allows these materials to make their way into our streams and water supply. Improper disposal includes disposal in the garbage, pouring down a sink or in the toilet, or pouring down a storm drain or in a drainage ditch.
