

Cooling Tower 101 Workshop

September 13, 2011 | Two Alliance Center Building | 8:30 AM - 3 PM

Cooling towers represent one of the largest users of water in the commercial and industrial sectors. The efficient operation and management of a cooling tower can reduce water consumption and save energy. The Metropolitan North Georgia Water Planning District is partnering with Building Owners and Managers of Atlanta (BOMA) to offer a cooling tower workshop for building engineers, facility managers and local water providers.

This workshop will address the following topics and include a walk-through of a cooling tower:

- » Cycles of Concentration
- » Performance Contracting
- » Cooling tower blowdown optimization
- » Alternative sources of water supply for cooling tower make-up
- » Water quality issues
- » Alternative treatment technologies

Breakfast and lunch will be provided. Cost to attend is \$30. Registration is required and can be completed online at: <http://coolingtowerworkshop.eventbrite.com>
