**We take great pride in the plants that we get from
vendors, but do not guarantee these plants. You are
making a donation to our sale that supports Extension
programs and activities.**

HAPPY GARDENING FOR 2010!

BLUEBERRIES are relatively pest free and require little care once established. The average family needs 4-6 bushes. You can plant as few as two plants as long as you have two varieties for good cross-pollination. They prefer full sun, but can tolerate some shading. They will produce a small quantity of berries the first year and produce up to 2 gallons per bush after 3 years. You can plant them as close as 4-6 feet for a hedge or screening affect, or 10-12 feet apart as specimen plants. "Publication on Home Garden Blueberries" <http://pubs.caes.uga.edu/caespubs/pubcd/1106-w.html>

BLACKBERRIES are self-fruitful so you can plant just one plant and still get fruit. The average family needs 10-15 plants. They yield more in full sun but can tolerate some shade. They can be planted as close as two feet apart for a hedge or screen. Some choose to trellis for a neat landscape effect. Thornless blackberries are relatively pest free and require little care once established. The Arapaho and Navaho varieties are not as aggressive as their wild cousins and won't invade your flower or vegetable garden. With simple renewal pruning each winter, you can expect yields up to 3-4 pints per plant over 4-8 weeks. Publication on "Home Garden Raspberries/Blackberries" <http://pubs.caes.uga.edu/caespubs/pubcd/C766.htm>

DECIDUOUS AZALEA - Deciduous azaleas are shrubs in the genus Rhododendron. They are often native or hybridized from native stock. They have showy blooms ranging in color from white to purple, pink, red, orange and yellow and most are very fragrant. They prefer some shade and acid soil. Height and width will vary. Once established they are very hardy plants. <http://county.ces.uga.edu/cobb/Horticulture/Factsheets/admiralsims/admiralsemmes.htm>

VIBURNUMS - This genus has over 150 evergreen, semi-evergreen and deciduous woody plants. They are a popular landscape shrub admired for their outstanding fall foliage, fruit and flowers. Most blossom in spring, often with fragrant flowers ranging from white and cream to pink. Many species bear ornamental fruits in late summer or fall in colors of red, yellow, black or blue. Most viburnums are easy to grow and favor full sun to partial shade and are hardy from zones 4 to 8.

HEUCHERAS - (Coral Bells) One reason for the growing popularity of heucheras is their stunning array of leaf colors, shapes, sizes and textures. Those with showy foliage (often called alumroot) are striking as small-scale ground covers, in perennial borders and in containers.

FERNS - Nice additions to any landscape setting. <http://pubs.caes.uga.edu/caespubs/pubcd/B987-2/B987-2.html>

CAMELLIAS - Evergreen foliage from Camellias add character to any landscaping and the varieties in our sale will bloom in spring to add even more pop. <http://pubs.caes.uga.edu/caespubs/pubcd/B813-w.htm>

New Price!

Blueberry Bushes - 2 Year Old Plants
Cost \$8.00 (1 Gallon)

Climax - Alapaha - Premier – Chaucer
Early-season, usually starts ripening Mid-June

Austin - Brightwell - Powderblue
Mid-season, usually starts ripening in early July

Delite - Tifblue
Mid to Late-season, usually starts ripening middle to late July first of August

New Varieties

Blackberry Bushes - Cost \$6.00 (1 Gallon)

Arapaho - Thornless, ripens mid-late June for about 4 weeks. Fruit is firm with a slightly smaller seed than Navaho.

Navaho - Thornless, ripens early mid-July for about 5 weeks. Fruit is firm and yields over a longer season.

Ouachita - NEW - ripens early season for about 5 weeks. Good plump fruit! Thornless.

Raspberry Bushes - \$7.00 (1 Gallon)

Nova — Heritage

NEW

Both varieties are known for excellent fruit for jams and cooking. Very flavorful! Both Nova and Heritage have very few spines.

Deciduous Azalea - Cost \$12.00 (3 Gallon)

Admiral Semmes - NATIVE HYBRID
Fragrant, large, frilly yellow flowers. Mildew resistant, heat tolerant and a vigorous grower. Leaves are orange-bronze in fall. 4' - 5' tall and wide at maturity.

Gregory Bald - NATIVE HYBRID
Variations of orange flowers. Can grow to height of 4' tall and wide. Reminiscent of the great colors of the natural bald in the Cades Cove area of the Smokies. Each plant can vary in shades of orange.

Sweet - White Azalea

NEW

This white fragrant azalea extends color through the season. Blooms of delicious clove-spice fragrance are like white stars against dark green/blue foliage. Can show a hint of pink. Architectural form adds winter interest. NATIVE HYBRID

Viburnums - Cost \$6.00 (1 Gallon)

Evergreen - Viburnum
‘Spring Bouquet’
Lightly fragrant pinkish-white flowers in spring followed by dark blue-black fruit, moderate, upright grower, dense, compact growth. 4 - 8' tall and wide.

NEW

Deciduous - Viburnum
‘Shasta’
Showy, continuous bloomer all spring. The 5 inch long ovate leaves are bright green with a corrugated surface. When grown in a sunny location the leaves take on a purple-reddish color in the fall. Can reach width of over 6 feet and 4 foot tall. Easily pruned.

NEW

Ferns - \$6.00 - (1 Gallon)

Autumn Fern - Tassel Fern
East Indian Holly Fern

All 3 varieties are evergreen and great for landscape additions. Easy care make ferns a great selection.

NEW

Camellias - \$8.00 (1 Gallon)

‘Governor Mouton’ - Red/white - medium sized, semi-double to loose red blooms splashed with white. Beautiful Spring blooms.

‘Professor Sargent’ - Very unique blooms with heavily ruffled petals in early Spring. The dense evergreen foliage is glossy even in shade with perfect cut flowers which last several days.

NEW

Heuchera - Coral Bells - Cost \$7.00 (1 Gallon)

Caramel: More tolerant of heat and humidity than other's. Glowing, apricot-hued foliage that grows up to 12 inches tall and 20 inches wide. Pink flowers appear in spring.

Raspberry Ice - pink and dark pink two-toned flowers over striking foliage of raspberry and frosty silver. Best in partial shade, and will tolerate dry shade.
