<b>Total housing units</b>	<b>275,020</b>	<b>+/-74</b>

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

·For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, [Overview of Race and Hispanic Origin](#), issued March 2001. (pdf format)

·While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

## Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

#### Notes:

- Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to [Labor Force Guidance](#).
- Workers include members of the Armed Forces and civilians who were at work last week.
- Occupation codes are 4-digit codes, but are still based on Standard Occupational Classification 2000.
- Industry codes are 4-digit codes and are based on the North American Industry Classification System 2002. However, the Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.
- While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

·The median gross rent excludes no cash renters.

·While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

#### Notes:

·Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

·The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the [ACS Subject Definitions for Disability](#).

·Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

·While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

## U.S. Census Bureau

American FactFinder

**Gwinnett County, Georgia****Population and Housing Narrative Profile: 2006**Data Set: **2006 American Community Survey**Survey: **2006 American Community Survey**

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

**HOUSEHOLDS AND FAMILIES:** In 2006 there were 255,000 households in Gwinnett County. The average household size was 2.9 people.

Families made up 76 percent of the households in Gwinnett County. This figure includes both married-couple families (57 percent) and other families (19 percent). Nonfamily households made up 24 percent of all households in Gwinnett County. Most of the nonfamily households were people living alone, but some were composed of people living in households in which no one was related to the householder.

**The Types of Households in Gwinnett County, Georgia in 2006**

Source: American Community Survey, 2006

**NATIVITY AND LANGUAGE:** Twenty-four percent of the people living in Gwinnett County in 2006 were foreign born. Seventy-six percent was native, including 33 percent who were born in Georgia.

Among people at least five years old living in Gwinnett County in 2006, 30 percent spoke a language other than English at home. Of those speaking a language other than English at home, 54 percent spoke Spanish and 46 percent spoke some other language; 53 percent reported that they did not speak English "very well."

**GEOGRAPHIC MOBILITY:** In 2006, 79 percent of the people at least one year old living in Gwinnett County were living in the same residence one year earlier; 10 percent had moved during the past year from another residence in the same county, 5 percent from another county in the same state, 5 percent from another state, and 1 percent from abroad.

**Geographic Mobility of Residents of Gwinnett County, Georgia in 2006**

Source: American Community Survey, 2006

**EDUCATION:** In 2006, 87 percent of people 25 years and over had at least graduated from high school and 35 percent had a bachelor's degree or higher. Thirteen percent were dropouts; they were not enrolled in school and had not graduated from high school.

The total school enrollment in Gwinnett County was 208,000 in 2006. Nursery school and kindergarten enrollment was 28,000 and elementary or high school enrollment was 139,000 children. College or graduate school enrollment was 42,000.

**The Educational Attainment of People in Gwinnett County, Georgia in 2006**

Source: American Community Survey, 2006

**DISABILITY:** In Gwinnett County, among people at least five years old in 2006, 8 percent reported a disability. The likelihood of having a disability varied by age - from 3 percent of people 5 to 15 years old, to 7 percent of people 16 to 64 years old, and to 38 percent of those 65 and older.

**INDUSTRIES:** In 2006, for the employed population 16 years and older, the leading industries in Gwinnett County were Educational services, and health care, and social assistance, 14 percent, and Professional, scientific, and management, and administrative and waste management services, 14 percent.

**Employment by Industry in Gwinnett County, Georgia in 2006**

Source: American Community Survey, 2006

**OCCUPATIONS AND TYPE OF EMPLOYER:** Among the most common occupations were: Management, professional, and related occupations, 38 percent; Sales and office occupations, 28 percent; Construction, extraction, maintenance and repair occupations, 13 percent; Service occupations, 12 percent; and Production, transportation, and material moving occupations, 9 percent. Eighty-four percent of the people employed were Private wage and salary workers; 10 percent was Federal, state, or local government workers; and 6 percent was Self-employed in own not incorporated business workers.

**TRAVEL TO WORK:** Seventy-six percent of Gwinnett County workers drove to work alone in 2006, 13 percent carpooled, 1 percent took public transportation, and 3 percent used other means. The remaining 6 percent worked at home. Among those who commuted to work, it took them on average 34.1 minutes to get to work.

**INCOME:** The median income of households in Gwinnett County was \$63,189. Ninety-one percent of the households received earnings and 11 percent received retirement income other than Social Security. Fourteen percent of the households received Social Security. The average income from Social Security was \$14,569. These income sources are not mutually exclusive; that is, some households received income from more than one source.

**POVERTY AND PARTICIPATION IN GOVERNMENT PROGRAMS:** In 2006, 9 percent of people were in poverty. Twelve percent of related children under 18 were below the poverty level, compared with 7 percent of people 65 years old and over. Seven percent of all families and 23 percent of families with a female householder and no husband present had incomes below the poverty level.

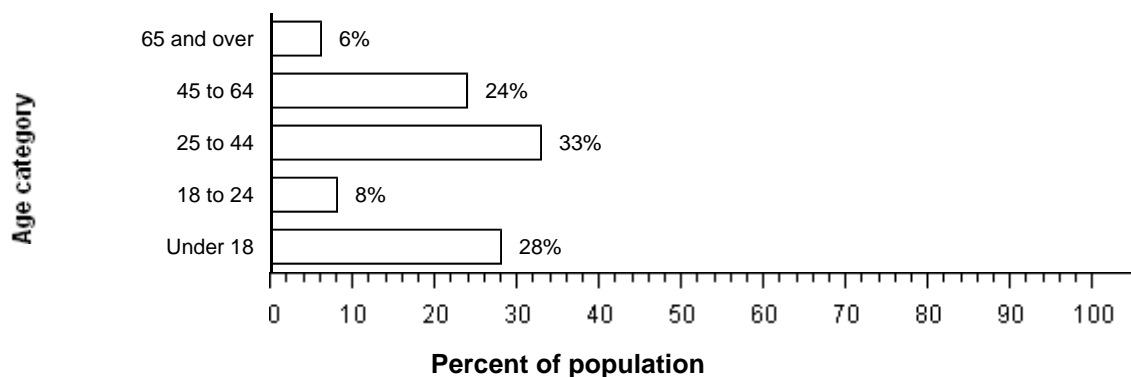

### Poverty Rates in Gwinnett County, Georgia in 2006

Source: American Community Survey, 2006

**POPULATION OF Gwinnett County:** In 2006, Gwinnett County had a total population of 757,000 - 375,000 (50 percent) females and 382,000 (50 percent) males. The median age was 33.5 years. Twenty-eight percent of the population was under 18 years and 6 percent was 65 years and older.

### The Age Distribution of People in Gwinnett County, Georgia in 2006

Source: American Community Survey, 2006

For people reporting one race alone, 61 percent was White; 21 percent was Black or African American; less than 0.5 percent was American Indian and Alaska Native; 9 percent was Asian; less than 0.5 percent was Native Hawaiian and Other Pacific Islander, and 8 percent was Some other race. Two percent reported Two or more races. Seventeen percent of the people in Gwinnett County was Hispanic. Fifty-two percent of the people in Gwinnett County was White non-Hispanic. People of Hispanic origin may be of any race.

**HOUSING CHARACTERISTICS:** In 2006, Gwinnett County had a total of 275,000 housing units, 7 percent of which were vacant. Of the total housing units, 78 percent was in single-unit structures, 20 percent was in multi-unit structures, and 2 percent was mobile homes. Fifty-six percent of the housing units were built since 1990.

### The Types of Housing Units in Gwinnett County, Georgia in 2006

Source: American Community Survey, 2006

**OCCUPIED HOUSING UNIT CHARACTERISTICS:** In 2006, Gwinnett County had 255,000 occupied housing units - 188,000 (74 percent) owner occupied and 67,000 (26 percent) renter occupied. Four percent of the households did not have telephone service and 3 percent of the households did not have access to a car, truck, or van for private use. Multi Vehicle households were not rare. Forty-six percent had two vehicles and another 22 percent had three or more.

**HOUSING COSTS:** The median monthly housing costs for mortgaged owners was \$1,539, nonmortgaged owners \$433, and renters \$892. Thirty-seven percent of owners with mortgages, 11 percent of owners without mortgages, and 47 percent of renters in Gwinnett County spent 30 percent or more of household income on housing.

#### Occupants with a Housing Cost Burden in Gwinnett County, Georgia in 2006

Source: American Community Survey, 2006

Source: U.S. Census Bureau, 2006 American Community Survey

The U.S. Census Bureau's Population Estimates Program produces the [official population estimates for the nation, states, counties and places](#), and the [official estimates of housing units for states and counties](#). The population and housing characteristics included above are derived from the American Community Survey.

**Notes:**

- Detail may not add to totals due to rounding.
- Percentages are based on unrounded numbers.
