Zoning History

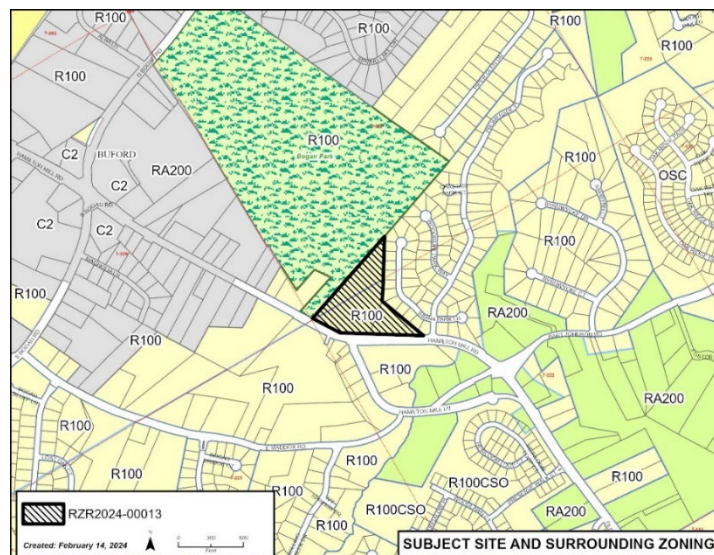

The subject property is zoned R-100 (Single-Family Residence District) and is within the Highway 124/324/Hamilton Mill Road Overlay District. There are no zoning cases on record for this property.

Existing Site Condition

The subject property is an 8.42-acre assemblage of two parcels located at the intersection of Hamilton Mill Road with Hamilton Mill Lane. The site is wooded and contains a single-family residence and a small pond near the Hamilton Mill Road frontage. There is a stream running through the southwest corner of the site into a drainage easement and under Hamilton Mill Road. A small pond lies to the west of the residence and north of the stream. There is a 20-foot-wide sanitary sewer easement traversing north and then west through the center of the site. A guard rail spans a portion of the property frontage on Hamilton Mill Road. There are no sidewalks or overhead power lines along the Hamilton Mill Road frontage. The nearest Gwinnett County Transit stop is approximately 3.9 miles from the subject property.

Surrounding Use and Zoning

The site is located within a single-family residential area comprised mostly of residences along Hamilton Mill Road on large lots. The Park at Mill Creek is the only single-family detached subdivision along this segment of Hamilton Mill Road and abuts the site to the east. Lot sizes in this subdivision range from 10,500 square feet to over 22,000 square feet. Bogan Park, which includes trails and recreational facilities, is located to the north and west of the site. A grocery store-anchored shopping center is located nearby at the intersection of Hamilton Mill Road and Bogan Road. The following is a summary of surrounding uses and zoning:

Location	Land Use	Zoning	Density
Proposed	Single-Family Residential	R-SR	3.55 units per acre
North	Bogan Park	R-100	N/A
East	Single-Family Residential	R-100 MOD	2.03 units per acre
South	Single-Family Residential	R-100	2.17 units per acre
	Undeveloped	R-100	N/A
West	Bogan Park	R-100	N/A

Project Summary

The applicant requests to rezone 8.42 acres from R-100 to R-SR for a senior-oriented detached subdivision, including:

- A 30-unit single-family detached subdivision at a density of 3.55 units per acre.
- Active adult ranch-style residences with a heated floor area between 1,700 and 2,400 square feet and front-loaded, two-car garages.
- Homes featuring bonus rooms on the second floor, sunrooms, and front porches.
- A total of 2.20 acres of open space in the front and center of the subdivision.
- A total of 0.49 acres of usable open space within a centrally-located park area including a pavilion and mail kiosk.
- A trail connection from the northern cul-de-sac to Bogan Park.
- A 40-foot-wide street frontage setback with a 10-foot-wide landscape strip along Hamilton Mill Road.
- A 40-foot-wide building setback including a 20-foot-wide landscape buffer within lots 6-20 along the eastern property lines.
- One full-access entrance on Hamilton Mill Road with a left-turn lane into the site.
- 27-foot-wide internal streets within 50-foot-wide rights-of-way.
- Five-foot-wide sidewalks along Hamilton Mill Road, and on both sides of the proposed internal streets.
- A stormwater management facility located in the southwest corner of the subdivision outside of the 50-foot-wide undisturbed stream buffer.
- Required stream buffers and impervious setback in the southwest corner of the site within the open space, stormwater management area, and two lots.
- Relocation of the existing sanitary sewer easement to run under the street and to the west between lots 24 and 25.
- Exterior facades of white wood siding with rustic stone and colored window shutters.

Zoning and Development Standards

The applicant is requesting a rezoning to R-SR for a senior-oriented subdivision. The application was received after January 1, 2024 and is subject to the amended Unified Development Ordinance (UDO). The following is a summary of applicable development standards from the UDO:

Standard	Required	Proposed	Meets Standard?
Density	Maximum 4.0 units per acre	3.68 units per acre	YES
Lot Size	Minimum 5,000 square feet	5,000 square feet	YES
Lot Width	Minimum 50'	≥50'	YES
Lot Coverage	Maximum 70%	<70%	YES
Front Yard Setback	Minimum 10'	10'	YES
Rear Yard Setback	Minimum 20'	20'	YES
Side Yard Setback	Minimum 5'	5'	YES
Building Height	Maximum 35'	<35'	YES
Project Area	Minimum 10 acres	8.42 acres	NO*
Open Space	Minimum 10% or 0.85 acres	26.9% or 2.27 acres	YES
Usable Open Space	Minimum 5% or 0.43 acres	5.5% or 0.46 acres	YES
Street Frontage Setback	Minimum 40' 10' wide landscape strip	40' setback 10' wide landscape strip	YES

* The applicant has requested a variance for the minimum project area.

Variance Request

In addition to the rezoning request, the applicant is seeking a variance from the following provision of Title II of the UDO:

- Section 210-120 Dimensional Standards for Base Residential Zoning Districts

Minimum Project Area within R-SR: 10 acres

The applicant is requesting to reduce the required project area for the R-SR zoning district from 10 acres to 8.42 acres.

Public Participation

The applicant held a community meeting for the development on February 22, 2024, at the Gwinnett County Historic Courthouse in Lawrenceville. There were eleven community members in attendance, who raised concerns including density, traffic, loss of greenspace, rental and age restrictions, and stormwater management. The primary concern was the environmental impact of the development on the site. The applicant submitted a revised site plan on March 21, 2024, that reduces the development from 31 to 30 units, adds a 40-foot-wide setback and 20-foot-wide landscape buffer along the eastern property lines, and identifies probable undisturbed areas. The public participation report is shown in Exhibit H.

Internal and External Agency Review

In addition to these Development Standards, the applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency review comments are attached (Exhibit I). Standard site and infrastructure improvements will also be required related to stormwater, transportation, water, and sewer utilities. Recommended improvements not already required by the UDO have been added as staff recommended conditions.

Staff Analysis

Rezoning Request Analysis: According to the UDO, if a proposed amendment is for the rezoning of property and involves a change in zoning classification, the Department shall evaluate the request and make a recommendation with respect to the standards governing exercise of zoning power as defined in Section 270-20.5. After this evaluation, staff makes the following findings based on the standards from the UDO:

A. Whether a proposed rezoning will permit a use that is suitable in view of the use and development of adjacent and nearby property.

The residential properties surrounding the site have significantly larger lots than the proposed subdivision. Single-family residences along Hamilton Mill Road have at least 0.5 acres of land. In addition, The Park at Mill Creek that abuts the site has lot sizes between 10,500 square feet to over 22,000 square feet. The predominant lot sizes proposed are between 5,000 and 6,100 square feet. The proposed rezoning will permit a use that is not suitable in view of the use and development of adjacent and nearby property.

B. Whether a proposed rezoning will adversely affect the existing use or usability of adjacent or nearby property.

The proposed development with higher density and smaller lot sizes than existing residential development would adversely affect the existing use and usability of adjacent and nearby properties, especially given that no buffer is provided along the east property line abutting the Park at Mill Creek subdivision.

C. Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.

The property has a reasonable economic use as currently zoned.

D. Whether the proposed rezoning will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.

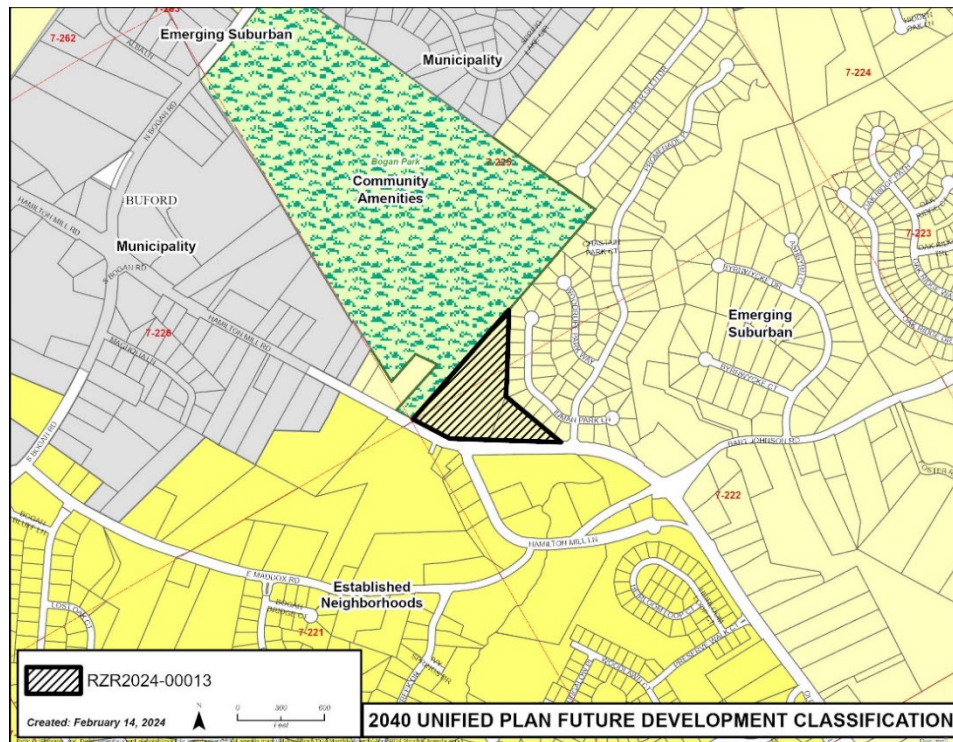

An increase in impacts on public facilities would be anticipated in the form of traffic, utility demand, and stormwater runoff; however, these impacts would be mitigated with appropriate conditions, site development requirements, and planning. The traffic impact study estimated the proposed development would generate 16 AM and 18 PM peak hour trips. The study concluded that the project would have minimal impact on traffic operations and would not meet the threshold to require a right-turn lane into the development. No impact is anticipated on school enrollment. Agency review comments related to any potential improvements concerning this

rezoning request are attached (Exhibit I).

E. Whether the proposed rezoning is in conformity with the policy and intent of the Unified Plan and Future Development Map; and

The application was received prior to the adoption of the 2045 Unified Plan, and was analyzed based on the 2040 Unified Plan. The subject property is located within the Emerging Suburban Character Area of the 2040 Unified Plan Future Development Map. This character area designates areas that are currently mainly residential but have not yet matured into established communities due to relatively large amounts of remaining, undeveloped land. The character area is expected to experience new single-family detached residential development during the 20-year planning period contemplated by the Unified Plan.

Although the Emerging Suburban Character Area recommends large lot and low-density residential development within various zoning districts including R-SR, further consideration must be given to the surrounding area to determine which zoning districts are the most compatible. Given the densities in the surrounding area are approximately 2 units per acre, other recommended zoning districts for the Emerging Suburban Character Area would be more appropriate, especially the existing R-100 zoning. The proposed rezoning is not in conformity with the policy and intent of the Unified Plan and Future Development Map.

F. Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the proposed rezoning.

The proposed development fails to meet the minimum project size. The proposed site plan attempts to maximize the number of lots by providing the minimum required lot area and lot

lines that are not radial to cul-de-sacs as required. Besides the common green in the middle, the remaining open space is within land that could not be developed due to stream buffers and topography, which give supporting grounds for denial.

Variance Request Analysis: The standards for granting variances are outlined in Section 270-90.7 of the UDO. Staff makes the following findings related to the variance request:

The applicant is requesting to reduce the required project area for the R-SR zoning district from 10 acres to 8.42 acres. The minimum project area is intended to provide sufficient land for a senior-oriented community complete with usable open space and amenities. The proposed layout meets the minimum usable open space requirements with a modest park and pavilion area, but offers no other amenities to residents. The additional proposed open space is excess land that either has a hilly terrain or is within stream buffers. Approval of the variance would be opposed to the purpose and intent of the UDO. Staff recommends denial of the zoning request and thus the variance request.

Staff Recommendation

Based on the staff's evaluation of the request and the standards governing the exercise of zoning power, the Department of Planning and Development recommends **DENIAL** of the rezoning request.

In addition, staff recommends **DENIAL** of the following variance:

1. To reduce the required project area for the R-SR zoning district from 10 acres to 8.42 acres.

Staff Recommended Conditions

NOTE: The following conditions are provided as a guide should the Board of Commissioners choose to approve this petition.

Approval as R-SR for a single-family detached subdivision subject to the following conditions:

1. The development shall be limited to single-family detached dwellings and accessory uses and structures, not exceeding 30 units.
2. The proposed development shall be constructed in general conformance with Exhibit B: Site Plan dated received March 21, 2024, with revisions required by conditions and the Unified Development Ordinance, subject to the review and approval of the Department of Planning and Development.
3. Exterior building materials shall be of brick, stacked stone, fiber cement shake, siding, and/or board and batten.
4. The minimum heated floor area of each dwelling shall be 1,700 square feet.
5. A future trail connection to Bogan Park shall be provided, in general conformance with Exhibit B: Site Plan dated received February 9, 2024, subject to the review and approval of the Gwinnett County Department of Community Services.

6. A 12-foot-wide concrete mixed-use path along the Hamilton Mill Road frontage shall be constructed, subject to the review and approval of the Gwinnett County Department of Transportation.
7. A left-turn deceleration lane along Hamilton Mill Road into the site shall be constructed, subject to the review and approval of the Gwinnett County Department of Transportation.
8. Stormwater BMP facilities shall be screened from view of adjoining properties and rights-of-way by landscaping and/or decorative fencing that is in compliance with the Gwinnett County Stormwater Management Manual, subject to review and approval by the Department of Planning and Development.
9. Buildable lots and stormwater management areas shall be located outside of required stream buffers and impervious setbacks.
10. Natural vegetation shall remain on the property until the issuance of a development permit.
11. All grassed areas within residential lots and usable open space areas shall be sodded.

**LETTER OF INTENT FOR REZONING APPLICATION OF
O'DWYER PROPERTIES, LLC**

Mahaffey Pickens Tucker, LLP submits this Letter of Intent and attached Rezoning application (the “Application”) on behalf of O’Dwyer Properties, LLC (the “Applicant”) relative to an approximately 8.42-acre tract of land (the “Property”) located at 3871 Hamilton Mill Road and 3800 Block of Hamilton Mill Road. The Property consists of two tax parcels: R7222 015 and R7222 247. The Applicant requests that the County rezone the Property to the R-SR classification to develop the Property for detached senior residences.

The proposed development is designed to serve the housing needs of senior residents. The Property has road frontage on Hamilton Mill Road. The Applicant is proposing to develop the Property into 31 senior living homes. The density of the development would be 3.68 units per acre. The homes will be “active adult ranch” style with a range of 2,400 to 1,700 square feet. The larger homes will have bonus rooms in the attic while the smaller homes will be true one-story ranch homes. Each home will have a driveway and two-car garage. The homes will be designed with an attractive combination of materials such as clean white wood siding with rustic stone and colored window shutters. Each home will have a modest and inviting landscaped yard. The front of the homes provides each unit with a charming covered porch. The floor plan of the homes will include amenities such as a sunroom, and an optional French door or triple sliding glass door off of the

family room. The bonus room can be turned into a bedroom, home office, or craft room depending on each resident's needs. The homes will be available for purchase to potential residents.

The proposed development will connect to Bogan Park. The development would enjoy access to Hamilton Mill Road from a full access driveway with a deceleration lane for entry. The proposed development would provide an option for seniors to age in place and remain in their current communities while transitioning to a neighborhood that is more compatible with their current stage of life.

In order to use the Property as set forth on the submitted site plan and the Application, the Applicant also requests the following relief from the Unified Development Ordinance:

- A variance from §210-120 to reduce the minimum project size from 10 acres to 8.42 acres to allow for the construction of the proposed development.
- A variance from §360-60.3 to allow for a reduction in the minimum radius requirement for the horizontal curve nearby the mail kiosk parking to preserve maximum open space in the center island as shown on the site plan.

A senior living community is an appropriate land use on the Property because it supports the goals of the 2040 Comprehensive Plan and is compatible with nearby land uses. The Property is located in the Emerging Suburban Character Area that contemplates senior-oriented residential developments as a potential development type. The proposed development will satisfy the goals of the comprehensive plan for the area by activating the underutilized property while still maintaining a quiet and safe environment for the residents.

The proposed development is compatible with surrounding uses. The property borders Bogan Park Community Recreation and Aquatic Center and The Park at Mill Creek subdivision. The residents of the proposed development will enjoy walkable access to the amenities at Bogan Park, and about a three-minute drive to the Publix Supermarket located at the intersection of Hamilton Mill Road and Bogan Road. As a senior community, the proposed development will have little to no impact on the schools in the area. Because of the relatively low density of the

GWINNETT COUNTY
PLANNING AND DEVELOPMENT

RECEIVED

2.9.2024

BF

proposed development and its quiet nature, the proposed use is compatible with these existing uses and would provide appropriate land use to the area.

The Applicant and its representatives welcome the opportunity to meet with staff of the Gwinnett County Planning & Development Department to answer any questions or to address any concerns relating to the matters set forth in this letter or in the Application filed herewith. The Applicant respectfully requests your approval of the Application.

This 25th day of January, 2024.

Respectfully Submitted,

REZONING APPLICANT'S RESPONSE
STANDARDS GOVERNING THE EXERCISE OF THE ZONING POWER

PURSUANT TO REQUIREMENTS OF THE UNIFIED DEVELOPMENT ORDINANCE, THE BOARD OF COMMISSIONERS FINDS THAT THE FOLLOWING STANDARDS ARE RELEVANT IN BALANCING THE INTEREST IN PROMOTING THE PUBLIC HEALTH, SAFETY, MORALITY OR GENERAL WELFARE AGAINST THE RIGHT TO THE UNRESTRICTED USE OF PROPERTY AND SHALL GOVERN THE EXERCISE OF THE ZONING POWER.

PLEASE RESPOND TO THE FOLLOWING STANDARDS IN THE SPACE PROVIDED OR USE AN ATTACHMENT AS NECESSARY:

- (A) WHETHER A PROPOSED REZONING WILL PERMIT A USE THAT IS SUITABLE IN VIEW OF THE USE AND DEVELOPMENT OF ADJACENT AND NEARBY PROPERTY:

Please see attached.

- (B) WHETHER A PROPOSED REZONING WILL ADVERSELY AFFECT THE EXISTING USE OR USABILITY OF ADJACENT OR NEARBY PROPERTY:

Please see attached.

- (C) WHETHER THE PROPERTY TO BE AFFECTED BY A PROPOSED REZONING HAS REASONABLE ECONOMIC USE AS CURRENTLY ZONED:

Please see attached.

- (D) WHETHER THE PROPOSED REZONING WILL RESULT IN A USE WHICH WILL OR COULD CAUSE AN EXCESSIVE OR BURDENSOME USE OF EXISTING STREETS, TRANSPORTATION FACILITIES, UTILITIES, OR SCHOOLS:

Please see attached.

- (E) WHETHER THE PROPOSED REZONING IS IN CONFORMITY WITH THE POLICY AND INTENT OF THE LAND USE PLAN:

Please see attached.

- (F) WHETHER THERE ARE OTHER EXISTING OR CHANGING CONDITIONS AFFECTING THE USE AND DEVELOPMENT OF THE PROPERTY WHICH GIVE SUPPORTING GROUNDS FOR EITHER APPROVAL OR DISAPPROVAL OF THE PROPOSED REZONING:

Please see attached.

RECEIVED

1.23.2024

REZONING APPLICANT'S RESPONSE
STANDARDS GOVERNING THE EXERCISE OF THE ZONING POWER

- (A) The proposed rezoning will permit a use that is suitable in view of the use and development of adjacent and nearby properties. The proposed development is compatible with the residential nature of the area.
- (B) The proposed rezoning will not adversely affect the existing use or usability of any of the nearby properties. The proposed development is complementary to the nearby residential developments and will provide a housing option for senior citizens of the County.
- (C) Due to the odd size, layout, location, and topography of the subject property, the Applicant submits that the subject property does not have reasonable economic use as currently zoned.
- (D) The proposed rezoning will not result in an excessive or burdensome use of the infrastructure systems. The development is planned as detached senior residences. As such, the low development density will not overly burden infrastructure systems, and the age restriction drastically limits the likelihood that the development will affect the schools in the area.
- (E) The proposed rezoning is in conformity with the policy and intent of the Land Use Plan. In fact, the Plan explicitly encourages R-SR developments in the Emerging Suburban Character Area.
- (F) Applicant submits that the ability to connect to nearby Gwinnett County trails provides additional support for the application.

Sewer Capacity Request #C2024-019-02	
Expiration Date: 02/06/2025	
Tie-In Manhole FID: 263605	

RE: Sewer Availability for Proposed Development – 3871 & 3651 Hamilton Mill Road Tract
Parcel ID 7222 015 & 7222 247

Dear Mr. Tench:

Gwinnett County Department of Water Resources (GCDWR) has reviewed the impact of the proposed development consisting of 31 homes on the above parcel(s) and determined:

Gwinnett County has adequate sewer capacity to serve the proposed development.

This confirmation is based on your anticipated annual average daily flow of **5.38 gpm** discharging to the sewer tie-in manhole at Facility ID **263605**.

Capacity Allocation: Sewer capacities are allocated only upon the issuance of a Development Permit, by Gwinnett County Planning & Development and after all applicable conditions established in this Sewer Capacity Certification, if any, are met.

Certification Expiration: The Sewer Capacity Certification is valid for 12 months from the date of this letter. If rezoning is approved, GCDWR will issue a revised Sewer Capacity Certification based on the approved units, as needed. The capacity request can be renewed for an additional 12 months. If a Development Permit has not been obtained by the expiration date above the developer may apply for renewal by providing evidence of active rezoning, plan review, or permitting efforts.

Once the Sewer Capacity Certification expires, the capacity is no longer allocated, and a new Sewer Capacity Certification request must be submitted for re-evaluation with no guarantee of available capacity. The evaluation will be based on the updated conditions of the sewer system.

Certification Invalidation: This certification is not valid if there are proposed changes to your development that could impact downstream sewer capacity (e.g. land use density, sewer tie-in manhole, parcel changes, and/or rezoning). In this case the development must resubmit for a new Sewer Capacity Request with updated information prior to the expiration of the previous one.

6.0 PROPOSED DEVELOPMENT

The proposed Hamilton Mill Road Tract residential development will be located on Hamilton Mill Road in Buford, Gwinnett County, Georgia. The development will consist of 31 single-family senior adult housing lots and proposes one full access driveway on Hamilton Mill Road across from Hamilton Mill Lane.

A site plan is shown in Figure 4.

GWINNETT COUNTY
PLANNING AND DEVELOPMENT
RECEIVED
1.23.2024

6.1 Trip Generation

Trip generation estimates for the project were based on the rates and equations published in the 11th edition of the Institute of Transportation Engineers (ITE) Trip Generation report. This reference contains traffic volume count data collected at similar facilities nationwide. The trip generation was based on the following ITE *Land Use: Senior Adult Housing - Single-Family*. The calculated total trip generation for the proposed development is shown in Table 4.

TABLE 4 – TRIP GENERATION											
Land Use	Size	AM Peak Hour			School PM Peak			PM Peak Hour			24 Hour
		Enter	Exit	Total	Enter	Exit	Total	Enter	Exit	Total	2-way
ITE 251 – Senior Adult Housing - Single-Family	31 units	5	11	16	10	7	17	11	7	18	219

* School PM peak hour trips estimated from 3pm-4pm rates from the ITE's 24-hour Vehicle Time of Day Distribution excel

6.2 Trip Distribution

The trip distribution describes how traffic arrives and departs from the site. An overall trip distribution was developed for the site based on a review of the existing travel patterns in the area and the locations of major roadways and highways that will serve the development. The site-generated peak hour traffic volumes, shown in Table 4, were assigned to the study area intersections based on this distribution. The outer-leg distribution and AM and PM peak hour new traffic generated by the site are shown in Figure 5.

8.0 CONCLUSIONS AND RECOMMENDATIONS

Traffic impacts were evaluated for the proposed Hamilton Mill Road Tract residential development that will be located on Hamilton Mill Road in Buford, Gwinnett County, Georgia. The development will consist of 31 single-family senior adult housing lots and proposes one full access driveway on Hamilton Mill Road across from Hamilton Mill Lane.

Existing and future operations after completion of the project were analyzed at the intersections of:

- Hamilton Mill Road @ Bogan Road
- Hamilton Mill Road @ Hamilton Mill Lane / Proposed Site Driveway
- Hamilton Mill Road @ Promenade Place

The results of the existing traffic operations analysis indicate that the signalized study intersection of Hamilton Mill Road at Bogan Road is operating at an overall level of service “D” or better in all the AM, school dismissal and PM peak hours. All the stop-controlled approaches at the unsignalized intersections are also operating at a level of service “D” or better with peak hour traffic.

A right turn lane will not be warranted at the proposed site driveway per GDOT standards. A Left turn lane will not be warranted either per Gwinnett County Left Turn Lane Guidelines. Based on the projected site-generated traffic volumes and distribution, the proposed development will have minimal impact on traffic operations in the study network.

8.1 Recommendations for Site Access Configuration

The following access configuration is recommended for the proposed site driveway intersection:

- Full Access Site Driveway on Hamilton Mill Road across from Hamilton Mill Lane
 - One entering and one exiting lanes.
 - Stop-sign controlled on the site driveway and Hamilton Mill Lane approaches with Hamilton Mill Road remaining free flow.
 - Provide adequate sight distance per AASHTO standards.

Public Participation Plan

1. Who do you intend to contact in addition to property owners within 1,000 feet of the site, if any?

None.

2. Where do you plan to host the Public Participation Meeting? Ensure that the meeting is held in person at a convenient location for interested parties.

Gwinnett Historic Courthouse

3. What date and time do you plan to host the Public Participation Meeting? Ensure that the meeting is held at a convenient time for interested parties, e.g. not during typical work hours on weekdays.

The Public Participation Meeting would be held on a February 22nd, starting at 6:00 p.m.

4. What is your method for providing opportunities for discussion with interested parties at the Public Participation Meeting?

After a presentation, the Applicant team would open the meeting for comments and questions from the attendees.

PUBLIC PARTICIPATION REPORT FOR
CASE NUMBER RZR2024-00013

The purpose of this letter is to provide more detail to the Gwinnett County Planning and Development Department about the discussions the Applicant had with the community during the Public Participation Meeting for case number RZR2024-00013.

Overall, the Applicant was pleased with the outcome of the meeting. The Applicant appreciated the opportunity to meet members of the community and hear about their feelings regarding the proposed development. A couple that lives right next door to the subject property stated that they are pleased the proposed development is senior residences because senior developments generate less traffic, crime, noise, and are limited in height. Another neighbor echoed the couple’s sentiment and explained that development is inevitable, and he would rather have the proposed development in his backyard than something more intense.

4. What issues and concerns were expressed by attendees at the meeting?

Here is a non-exhaustive list of the attendees concerns: density, impact on home values, traffic on Hamilton Mill Road, loss of greenspace, wildlife preservation, tree preservation, buffer between the proposed development and the adjacent neighborhood, access to Bogan Park, walkability and connectivity, rental and age restrictions, stormwater and stream buffers, privacy, noise from Bogan Park, other nearby development in the area, and general concerns of what is the best use for the subject property.

One neighbor expressed concern that the Applicant was just “checking a box” by holding the public meeting and did not have genuine interest in the neighbors’ concerns. The Applicant assured the attendees that while the County does require Applicants to hold public meetings prior to the public hearings, the Applicant typically holds these meetings anyway and has a genuine interest in finding a workable solution to as many reasonable concerns as possible.

5. What are the applicant’s responses to the issues and concerns that were expressed at the meetings? What changes to the development will be made?

The Applicant intends to make a good faith effort to address all the attendees’ concerns and will provide a detailed update to the neighbors as soon as practicable but no later than the planning commission public hearing.

Applicant has already made changes to its site plan in response to the neighbors' concern about privacy, noise pollution, loss of greenspace, wildlife preservation, tree preservation, and buffer area. The Applicant increased the building setback line along the eastern side of the property to 40 feet, and added a 20-foot landscape buffer along the boundary with The Park at Mill Creek Subdivision. The Applicant preserved undisturbed areas behind lot 20 and next to lot 6 in an effort to preserve green space and natural vegetation.

At the Public Participation Meeting, the Applicant was able to address a few concerns. In regard to the concern about traffic on Hamilton Mill Road, the Applicant encouraged the attendees to reach out to DOT with their desires for traffic calming devices and a traffic light. The Applicant and attendees discussed that senior communities generally impact traffic less than other developments, and senior residents typically avoid high traffic times such as rush hour and school traffic. The Applicant also informed the attendees that a traffic impact study will be included in the planning and development staff report and told them where to find it.

In response to the concern about the proposed development's impact on home values, the Applicant explained that new houses generally raise surrounding home values. The Applicant emphasized that the proposed development homes will be semi-custom and that the Applicant is a local developer focused on building quality communities. The homes will start at a competitive price and be offered to potential residents on a for-purchase basis. The community will have an HOA with an age-restriction.

The Applicant understands that the attendees who live next door to the subject property do not want any development in their backyard, and would prefer that the subject property remain undeveloped. However, the Applicant explained that the subject property is currently zoned R-100 and as such can be developed by right into single-family homes.

Water & Sewer Utility Map

Water Comments: The proposed development shall extend a minimum 8-inch water main across the frontage of the subject site, to the 8-inch water main on the northern right-of-way of Hamilton Mill Road, near the intersection with Promenade Place. The existing 48-inch water main along Hamilton Mill Road must be avoided during all phases of construction, including the construction of deceleration lanes.

Sewer Comments: A previous Sewer Capacity Certification (C2021-019-02) has expired; a new sewer capacity request must be submitted. Pending available capacity, the proposed development may connect to an existing 8-inch gravity sewer located on the subject site. Relocation of the existing sewer and its easement may be required.

Water Availability: Water demands imposed by the proposed development may require upsizing or extensions of existing water mains in order to meet Gwinnett County Standards and fire flow demands. Any cost associated with such required improvements will be the responsibility of the development. Current Gwinnett County Standards require a minimum of 12" pipe size for commercial developments and a minimum of 8" pipe size for residential developments. Additionally, connection to a minimum of 12" and 8" mains are required for commercial and residential developments, respectively. It is the responsibility of the developer's engineer to confirm pressure and volumes are available for the development.

Sewer Availability: A Sewer Capacity Certification must be obtained from Gwinnett County to confirm the existing system can serve the development. Sewer demands imposed by the proposed development may require upsizing and/or extensions of existing sewer mains, and/or upsizing of an existing pump station, and/or installation of a new pump station. Any cost associated with such required improvements will be the responsibility of the development. The developer shall provide easements for future sewer connection to all locations designated by Gwinnett County during plan review.

Water and Sewer Design and Construction Requirements: Extensions of the water and/or sanitary sewer systems within the subject development must conform to this department's policies, Gwinnett County's ordinances, and the Water Main and Sanitary Sewer Design and Construction Standards and Specifications, dated April 5th, 2016. Subsequent to design, construction, inspection, and final acceptance of the required utilities, service would then become available under the applicable utility permit rate schedules.

Private Road Developments: Any development with private roads must comply with the Standard Policy Requirement for the Installation of Water and Sanitary Sewer Mains within Private Developments. This policy stipulates minimum easement requirements and location of public mains and appurtenances, among other requirements.
