Erosion Control

My signature hereon signifies that I am the person responsible for compliance with the Soil Erosion & Sediment Control Ordinance. I acknowledge that county inspection staff may: refuse to make inspections, issue Stop Work Orders, and issue summons's to appear in Recorder's Court for violations of erosion control requirements; and that I must use Best Management Practices (BMP's) to control soil erosion on my job site which includes, at a minimum, all of the following:

- Installation and daily maintenance of silt barriers (i.e. silt fences, hay bales, etc.) in those areas where water exits the job site;
- Installation and daily maintenance of a stone driveway entrance/exit pad to minimize the tracking of mud into the street; use geotextile underliner for entire pad;
- Removal of mud from the street or adjacent property immediately following any such occurrence without washing the mud into the storm drainage system;
- Maintenance and removal of mud from detention ponds and sediment basins;
- Conduct no land disturbing activities within 50 feet of the banks of streams, lakes, wetlands, etc. (i.e. "state waters");
- Within 14 days of ceasing land disturbance, whichever is earlier, temporary vegetation and/or mulch on all disturbed areas shall be provided & maintained daily.
- Institute E&SC measures and practices as indicated on the approved Soil Erosion & Sediment Control Plan.
