

Storm Water Management  
Development Permit Checklist Requirements

For each permit (case) type below, the checklists identified under the permit type should be annotated with the location on the plans or in the report where the particular comment has been addressed. Write the location where the comment has been addressed at the end of the comment. The description of the location should give page number and quadrant on the page at a minimum. If the comment does not apply, put "NA" at the end of the comment. **DO NOT JUST CHECK THE BOX AT THE BEGINNING OF THE COMMENT. THIS IS NOT SUFFICIENT TO MEET MINIMUM CRITERIA.** Turn in the required annotated checklists with the submittal.

CPL – Concept Plan

- 1) Concept Plan

SDP, CDP, or MDP – Preliminary Plan or Site Plan

- 1) Preliminary Plat or Site Plan
- 2) Storm Water Management Report
- 3) Water Quality Performance Review
