**COUNTY EXPANDS TRAFFIC MANAGEMENT SYSTEM  
TO SUGARLOAF PARKWAY**

(Lawrenceville, Ga., Aug. 5, 2008) - The County's traffic management system will soon be expanded along Sugarloaf Parkway to help manage peak-hour traffic congestion and improve safety. "In recent years, daily traffic volumes on Sugarloaf Parkway have increased to as high as 47,500 vehicles per day. A traffic management system is needed to help improve traffic conditions along this corridor," DOT Director Brian Allen said.

An intelligent transportation system consisting of 15 closed-circuit television cameras and fiber optic cables will be installed along 12.3 miles of Sugarloaf Parkway from Peachtree Industrial Boulevard to State Route 20/Grayson Highway. The system will enable arterial traffic monitoring, signal control and more rapid incident detection as well as control signal timing and manage traffic back-up due to incidents along the roadway and I-85.

The \$2.8 million project will be funded by the voter-approved 2001 SPLOST program and the Georgia Department of Transportation.
