BIDDING REQUIREMENTS

1. **Qualifications and Experience of Staff**

The contractor will be required to provide a combined minimum of 60 meter readers and field service order technicians, along with supervisory personnel, or subcontractors, for the efficient operation of the services hereunder. The contractor represents that all its employees, agents, subcontractors and suppliers who perform services under this contract shall be qualified and competent to perform such services. Any persons employed by the contractor in connection with such operation will be on the contractor's payroll and will be deemed employees of the contractor for all purposes including taxes and insurance. Any subcontractor not listed in the original bid must be preapproved by Gwinnett County Department of Water Resources (DWR) prior to their use. DWR shall not be responsible for any increase in price associated with the use of a new subcontractor proposed for use after award of the contract. The contractor's employees and subcontractors will comply with all rules promulgated by the County for the safe and orderly conduct of the activities carried out within the County.

Upon request, the contractor will provide detailed information that clearly demonstrates an employee's qualifications and their abilities to fulfill the requirements for this project.

2. **Certifications**

According to the current State law and County ordinances, meter reading personnel are not required to be certified. However, the contractor will be responsible for adhering to applicable State and local law and any subsequent changes/amendments thereto during the contract period, as exercised.

3. **Respondent Identification/Profile**

Give the full legal Name of the contractor, the contractor's principal business office and its satellite offices, if any; and indicate the location(s) from which these services for the Department would be staged. Contractor is responsible for providing their own office facilities. Provide the location of the contractor and the driving distance to the Department of Water Resources—Central Facility located at 684 Winder Highway, Lawrenceville 30045. DWR may request information on the contractor's history, business activities, size, employees, officers, affiliates, subsidiaries, ownership and other corporate data. Project teams are acceptable, provided that overall project accountability is with the lead contractor. If an association with other firm(s) is proposed, describe the working relationship, identify specific areas of responsibility of each firm, and identify the lead firm that will have overall project accountability, as well as any specific past experiences with said firm(s) and the working relationship. NOTE: Bid must be submitted by lead contractor, and subcontractors should be listed on the enclosed "List of Subcontractors" form. Contract shall be executed by the lead contractor who submits the bid. The lead contractor shall be solely responsible for the execution and quality of the work performed. The Department shall have no contractual obligations to or with the sub-contractors.

4. **References**

Each reference should include the project name, location, description (size and characteristics), date of completion, contract amount, and contact information. Indicate the extent of the contractor's role, whether as lead, subcontractor, or partner. All information supplied should be correct, current, and easily verifiable. Failure to provide adequate information may result in bid being deemed non-responsive. References presented should clearly demonstrate the contractor's ability to accomplish DWR's key objectives. Similar projects are projects that required the same level of service, or greater, at the same order of magnitude, or greater, as will be required for this project. The experience must be that of the contractor(s) listed in the bid and not that of a parent or related company or the experience of an individual(s). The contractor should have been in business for a minimum of five (5) years. Of relevance would be experience of the contractor in providing meter reading services for State, County and Municipal governments or Water, Sewer and Power Utilities. If contractor submits references and project experience provided by subcontractor(s), they must be the subcontractor(s) for this project in a role relevant to the experience listed, or the associated reference will not be considered valid. Experience will be a determinant in establishing the responsibility of the contractor. If needed, additional references may be requested. References obtained by the County outside of what is submitted by the contractors may be taken into consideration.

SECTION 1 STATEMENT OF WORK

1.0 SCOPE

The Contractor shall provide daily water meter readings and completion of field service orders on an annual contract for Gwinnett County Department of Water Resources (DWR). DWR has approximately 277,000 water meters that must be read each month (currently ranging from approximately 13,000 to 18,000 per workday). In addition, field service orders are assigned on an as-needed basis to address other needs beyond meter reads. During 2021, DWR assigned an average of 8,300 service orders per month to the contractor, but this number varies month to month. It shall be the responsibility of the contractor to supply a combined minimum of 60 meter readers and field service order technicians to successfully read all meters and perform all service orders within the timeframe set forth in this contract.

The quantities listed in the Bid Schedule are approximated and are for the sole purpose of assuring uniformity between contractors. Payment shall be for the actual quantities assigned and successfully completed.

TRANSITION PLAN SUBMITAL

The contractor's submittal to address their plan for ensuring the continuity of service during the transition phase between the existing service provider and the initiation of services under this contract. Aspects to be covered should include but not necessarily be limited to, the provision of uninterrupted meter reading, data transfer and integrity, processing of service orders, and maintaining the quality of service provided to the customers.

1.1 PERFORMANCE SPECIFICATIONS

Meter Reading Volume:

Contractor will be required to complete approximately 13,000 to 18,000 meter reads per day, as assigned by DWR. Additional work assigned in the form of service orders shall not be considered valid reason for failure to complete the meter reading volumes set out herein.

Meter-reading routes will be standard routes defined by DWR and must be strictly adhered to.

Number of accounts per route may be adjusted upon thirty (30) days written notice by DWR. The Contractor may request adjustment of routes by written notice to the DWR representative. However, final determination of any adjustment will be made by DWR. Based on conservative growth estimates, an average of 5,000 new meters may be added to the system each year. It is the contractor's responsibility to account for additional staffing level requirements based on the addition of new meters.

Approximately 85% of the meters in the system are designated as residential and it is estimated that the ratio of walking routes to driving routes for these residential meters is 50/50. The remaining meters are associated to commercial and multi-family accounts, which are sized 2" to 10". Approximately 2,000 of these commercial meter locations are contained in vaults or pits and are expected to require special handling and/or entry by 2-person teams. All new 2" meters are installed into regular meter boxes.

All meter readings are completed using the Smart Phone Meter Reading (SPMR) system using Android smart phones. The Android phones are to be provided by the Contractor. All service orders (transfer, move-out, move-in, lock-offs and reconnects) will be assigned to the contractor, and completed through, a custom DWR web application on cell phones (smart phones). Cell phones for all field staff are to be provided by the winning contractor at their own expense and must be compatible with both cell phone applications.

1.1.2 Work Schedule:

Completed routes should be uploaded the same day of completion, no later than 9:00 PM. Files uploaded after 9:00PM will be considered submitted on the next business day.

The following holidays will be observed by DWR, unless otherwise notified. If the Contractor desires to perform field activities on the following holidays, they must acquire DWR approval, and minimize impacts to County staff

and residents.

- New Year's Day
- Martin Luther King Jr., Day
- Presidents' Day
- Memorial Day
- Independence Day
- Labor Day
- Veterans' Day
- Thanksgiving Day
- Day After Thanksgiving
- Christmas Eve
- Christmas Day

1.2 Quality Assurance:

Meter reads must be accurate, with an error level of no greater than 1 error per 1000 reads. On a monthly basis, a penalty of \$5.00 may be assessed for each reading error in excess of 1 per 1000 reads. Errors are defined as misreads found by field audit, re-reads requested by billing, customer requested rechecks which, after investigation, confirm a reading error, or meters that were unread without an associated skip code.

Example:	277,000	Meter Reads per Month
	300	Read errors during the month
	<u>-277</u>	Allowable error rate (1 per 1,000)
	23	Errors (penalty to be assessed)
	<u>\$5.00</u>	Penalty per read error
	\$115.00	Penalty to be subtracted from invoice

Meter reading errors for the vaulted meters will be allowed for 1 out of each 1000 accounts. Errors are defined as misreads found by field audit, re-reads requested by billing, or customer requested rechecks which, after investigation, confirm a reading error. A penalty of \$10.00 will be assessed for each reading error in excess of 1 per 1000.

1.3 Performance of Services:

Startup of Contract and new service areas

The Contractor should be fully operational and familiar with all routes and County operating procedures on the first day that the contract is in effect, except for special requests that are mutually agreed to between the Contractor and the County. The current contract for meter reading services expires on December 31, 2021. The successful contractor will be required to work with DWR staff to coordinate the workflow during the transition phase to ensure that there is not an interruption in services. The anticipated start date is January 01, 2022.

As development continues, DWR will add meter reading service areas and either adjust or add routes. Contractor to be given no more than thirty (30) calendar days to familiarize itself with new service areas added during the contract period.

Schedule: DWR will provide a meter reading schedule consisting of approximately 20 read days per month. Three days are allowed to complete each of the 20 portions. Contractor shall comply with this schedule to maintain the County's billing cycle. Gwinnett County operates on a daily billing cycle consisting of one portion per day. Each of the portions must be completed on the scheduled day, and all portions must be completed during the month. Failure by the Contractor to complete all scheduled meter readings and required re-reads within the allotted time will result in a charge back to the contractor in the amount of \$1,000.00 for each additional business day required to complete the meter reading portion.

Completed Routes: Time is of the essence in relation to the work to be performed. All meter reads are to be completed on the day scheduled. Weather conditions must not prevent the accomplishment of services under

this contract unless otherwise agreed to by an authorized representative of DWR. A waiver of penalties for a weather delay in one instance shall not be construed to mean that future waivers will be granted.

Incomplete Routes: Individual accounts within routes, full routes, or partial routes that are returned to DWR as "no read" will be reviewed daily. If upon further investigation it is determined that a reading should have been obtained under contract provisions and could have been obtained by the Contractor through a reasonable level of effort, a penalty of \$5.00 per account not read may be assessed. DWR may consider requests for a waiver of such penalty if contractor demonstrates that the missed reads were due to circumstances which could not be reasonably overcome, and were beyond the control of the contractor, such as a deliberate interference by the property owner or failure of the County software. Mechanical failure of contractor's vehicles or equipment shall not be sufficient reason to wave associated penalties.

If the Contractor finds meter routes can be changed to increase productivity, the Contractor should notify the DWR representative in writing and request changes accordingly.

Meter Conditions: Any physical condition of meter boxes which pose an impediment to readers or citizens must be entered in the hand-held processors by readers when observed. This shall include codes to create work orders to correct broken or obscured meter glass, box, etc. and any note of special interest must be entered such as illegal hookups (straight pipes). Special Notification to the authorized DWR representative is required when the meter reader observes a public safety problem.

Meter/Meter Box Maintenance: The Contractor will be responsible for the routine cleaning of meters and ensuring that accessibility to meters is not hampered by grass, sand, dirt, mud or debris of any kind. It is unacceptable for meter lids to be left off of meters after reading. The Contractor is to note any meter needing a replacement for a missing or broken lid, and a service order will be issued for the Contractor to replace it. Lids will be provided by DWR, and broken lids are to be returned to DWR. No service orders for repairs to meters or meter boxes will be issued to the Contractor.

The Contractor will be responsible for placing pre-printed door notices, provided by DWR, informing the customer of problems and conditions such as possible leaks and high consumption when such conditions are identified.

Transfer Orders: The contractor will be responsible for obtaining a final meter read for customers that are moving out, and to obtain an initial reading for customers that are moving in. Two work orders will be issued and completed as one complete work order. **Transfer orders must be completed no later than three business days after issuance or incur a \$20.00 penalty.**

Move Out Orders: The contractor will be responsible for obtaining a final meter reading for customers that are moving out with no new customer signing up for service at that time. A final meter reading will be taken, and the water meter will be locked off using a DWR supplied device. Two pictures shall be taken of the meter when the move out order is completed. One should show the reading on the meter and the second should show the lock-off device on the curb stop. **Move Out orders must be completed no later than three days after issuance or incur a \$20.00 penalty.**

Move In Application Orders: The contractor will be responsible for obtaining an initial meter reading, unlocking and restoring water services for customers that are moving in. If the customer is not present and there is evidence of a leak or constant flow upon restoring service, water service should be stopped but not locked and a door hanger should be placed to inform the customer of the situation. If a lock-off device is not on the curb stop when the move in order is completed, two pictures must be taken to document this. One should show the meter reading taken and the second should show the serial number of the meter and the curb stop. **Move In orders must be completed on the same of day of issuance or incur a \$100.00 penalty.**

Lock-off Orders: The contractor will be responsible for obtaining a meter reading for customers that are past due on their account. A meter reading will be taken, and the water meter will be locked off using a DWR supplied device. Two pictures shall be taken of the meter when the lock-off order is completed; one showing the reading on the meter, the second showing the lock-off device on the curb stop. **Lock-off orders must be completed no later than three days after issuance or incur a \$20.00 penalty.**

Reconnect Orders: The contractor will be responsible for obtaining a meter reading for customers that were locked off. A meter reading will be taken, and the water meter will be unlocked, and the water service restored. If the customer is not present and there is evidence of a leak or constant flow upon restoring service, water service should be stopped but not locked and a door hanger should be placed to inform the customer of the situation. The contractor will be responsible for identifying and reporting evidence of tampering or water theft. If a lock-off device is not on the curb stop when the reconnection order is completed, two pictures must be taken to document this. One should show the meter reading taken; the second should show the serial number of the meter and the curb stop. **Reconnect orders must be completed on the same of day of issuance or incur a \$100.00 penalty.**

Quality Standards: Meter reading errors for the service orders (Move In, Move-Out, Transfer, Reconnect and Lock-off) will be allowed for 1 out of each 1,000 orders. Errors are defined by each work order issued wherein a customer requests a re-read and after investigation, a reading error is confirmed. A penalty of **\$20.00** will be assessed for each reading error in excess of 1 per 1,000 Move In, Move-Out, Transfer, Reconnect and Lock-off Orders issued. Error rates are calculated based on the calendar month in which the service request was issued.

Timeliness Standards: DWR will issue the Move In Application, Move Out, Transfer, Lock-off and Reconnect orders no later than 8:00am each day.

1.4 **Reporting Requirements:**

The Contractor is responsible for submitting to the County, on a daily basis, pictures taken of meters, full reports with meter codes, and any incidents that may relate to the meter reading performance and the distribution system. The format of reports, and the reporting process used, must be approved by the County. Appropriate and accurate use of meter reader entered codes is critical to the County's utility billing operation and is a required part of the meter reading function. Inaccurate codes entered by the meter reader which result in estimated customer utility bills may be charged back to the contractor, at the rate of \$5.00 per inaccurately entered code.

1.5.1 **Contractor Performance Incentives:**

The County intends to provide incentive to the Contractor for assistance in resolving meter conditions which result in under-billing of utility charges to consumers. Specifically, the County will pay \$25.00 to the Contractor for each inoperative meter identified by the Contractor and verified by DWR, which has not been previously identified as inoperative by either party, and which is not inoperative due to abuse or damage. Furthermore, the County will pay \$25.00 to the Contractor for each meter connection reported by the Contractor to the County, which has not been previously identified, and has not been billed or obtained a meter reading within the previous six (6) months.

Gwinnett County will consider other instances in which incentive pay may be offered to the contractor, provided a savings to the County has been proven.

At DWR's request, the Contractor will schedule meetings to provide input and recommendations related to the performance of the contract, any deviations from schedule or performance, and potential improvements in the following areas: meter reading technology, meter reader productivity, lost/found meters, meter reading error reduction initiatives, potential opportunities to enhance County revenues or reduce County expenditures, and any other potential proposed improvements that the meter reading vendor would like to discuss.

If there are "exceptions" or comments to any of the solicitation requirements or other language, then the firm may make notes to those areas, but may not materially alter any document language.

XXVII. TAX LIABILITY

Local and state governmental entities must notify contractors of their use tax liability on public works projects. Under Georgia law, private contractors are responsible for paying a use tax equal to the sales tax rate on material and equipment purchased under a governmental exemption that is incorporated into a government construction project: excluding material and equipment provided for the installation, repair, or expansion of a public water, gas or sewer system when the property is installed for general distribution purposes. To the extent the tangible personal property maintains its character (for example the installation of a kitchen stove), it remains tax-exempt. However, if the installation incorporates the tangible personal property into realty, e.g., the installation of sheetrock, it becomes taxable to the private contractor.
