

September 14, 2022

**BL100-22**  
**PROVISION OF GROUNDS MAINTENANCE AT VARIOUS DEPARTMENT**  
**OF WATER RESOURCES FACILITIES ON AN ANNUAL CONTRACT**  
**ADDENDUM #2**

Note attached current pricing for the above referenced bid:

Bid Due Date, change to read as follows:

Bids should be typed or submitted in ink and returned in a sealed container marked on the outside with the BL# and Company Name. Bids will be received until 2:50 P.M. local time on **September 22, 2022**, at the Gwinnett County Financial Services - Purchasing Division – 2<sup>nd</sup> Floor, 75 Langley Drive, Lawrenceville, Georgia 30046. Any bid received after this date and time will not be accepted. Bids will be publicly opened and read at 3:00 P.M. Apparent bid results will be available the following business day on our website [www.gwinnettcountry.com](http://www.gwinnettcountry.com).

Clarifications:

- For sustainability reasons, if you are not bidding the locations on a particular Bid Schedule page, you do NOT have to return that page.
- Note that the drive is to be paid by FWH and not the lab or Water Tower.
- Raw Water Reservoir at Lanier Filter Plant: The area between the asphalt road atop the reservoir and the water's edge is NOT part of the contract. All slopes surrounding the reservoir are part of the contract.
- Disregard red mark on F. Wayne Hill map
- Weeds that pop up in gravel areas to be sprayed by mowing vendor.
- Service Provider shall staff its services so that there is always at least one staff person present at a service delivery site who speaks, reads and interprets the English language fluently. All supervisors and team leaders must be fluent in English.
- Replace Bid Schedule with the attached revised Bid Schedule, pages 13R-31R.
- Replace Specification pages 11 & 12 with the attached revised Specifications pages 11R & 12R.
- Certifications:
  - Georgia Certified Landscape Professional (Section H only)
  - Pesticide Applicators License, Category 24 from the Georgia Department of Agriculture (all sections)
- !!. General Requirements, item B change to read as follows:

The selected contractor shall provide all products necessary (mulch, straw, fertilizers, herbicides, pesticides, etc.); the items required to maintain each site are to be included in bid.

Questions/Answers:

Q1. Will we allow subs on Section H?

A1. [Note Section II. General Requirements, item D:](#)

[D. The selected Contractor shall not be permitted to subcontract any of the services to be provided under this bid, without prior approval from Gwinnett County.](#)

This is primarily for Section H and would be for task not called out directly in the bid tab such as irrigation repairs, annual flower plantings, etc. We will not allow a contractor to sub out the entire responsibility of the section. Any in event that a subcontractor is allowed, the subcontractor must be approved by Gwinnett County.

- Q2. All of the small site I have googled appear to be fire hydrants and sewers. How much space around them should be cut? Point B under section A says to cut driveways leading to locations. I don't see or understand what "driveways" you all are referring to
- A2. Small site locations are made up of pump stations, metering stations, raw water intakes, tanks & booster stations, etc. Each of these locations are gated with a drive leading up to them. A better description of several locations is listed in **VII. NOTES FOR VARIOUS LOCATIONS** on page 11 of the Invitation. However all locations must be maintained as they are, so to follow the existing mowing layout would be how it should be quoted. Area VI, also on page 11 refers to site location visits. In that area it explains the importance of these visits. It's recommended that they **NOT** be quoted from Google.

Note latitude and longitude coordinates added to the attached Revised Bid Scheduled.

Contact me if you're interested in seeing the Small Site photos. \*  
\* pictures include many of the small sites.

- Q3. My company is not currently certified as a "Georgia Certified Landscape Professional". However, the next available test to receive certification is December 8. That is exactly 1 month after the service start date. Will my company still have a chance at winning the bid without having this certification up front?
- A3. Vendors must have acquired the certification prior to bid submittal deadline. GCLP certification is only required for Section H of the bid.
- Q4. Do will have to bid on all sections? Are we allowed to bid only on the smaller locations or only larger locations?
- A4. You do not have to bid on all sections. Vendors can bid only on the sections they wish to provide service for.

This addendum should be acknowledged on Bid Form, page 32. Failure to do so may result in your bid being deemed non-responsive.

Thank you,

Shelley McWhorter, CPPB  
Purchasing Associate III

Contractor Name

otherwise provide direction on the usage of certain items. Gwinnett County reserves the right to refuse the use of any materials or chemicals the County deems to be substandard or unsuitable.

1. Aeration and Re-Seeding/Re-Sodding

Aeration, re-seeding, and re-sodding shall be in accordance with the Landscape Contractors Association, Landscape Specification Guidelines listed in Part 6: Seeding and Sodding. Areas will be considered as additional work and will be quoted by the provided contract pricing.

- a. When requested by the County representative, lawn areas shall be prepped, re-sown or re-sodded in areas where spot renovation and grass improvements are necessary. These areas shall be seeded with Kentucky 31 Fescue or Princess Bermuda Seed, or seed with equivalent quality, and covered with wheat straw. Where sod is needed, all sod types shall consist of either Bermuda Tifway 419, TifTuf Bermuda or Meyers Zoysia and after installation shall be watered in thoroughly, rolled, and if needed, top dressed with top dressing sand.
- b. Aeration of all mowed lawn areas shall consist of removing plugs to a depth of 1 ½ to 2 inches deep and in a uniform pattern over the entire lawn area.
- c. When requested a complete lawn aeration and over seeding shall be implemented with Kentucky 31 Fescue or Princess Bermuda seed or seed with equivalent quality.

Additional landscape needs such as tree, shrub, or plant installation will be considered additional work and will be quoted from the provided contract pricing. Irrigation needs may also be provided under this section.

Contractor shall submit a schedule prior to delivering services and shall notify Department of Water Resources as soon as possible of cancellation and changes to the schedule.

**VI. SITE LOCATION VISITS**

The scopes of the various tasks have been described herein. It is imperative that all prospective Contractors visit the sites and locations of the work to be performed. It shall be the responsibility of the Contractor to determine the approximate square footage of lawn and mulched areas and the numbers of ornamental trees and shrubs under these services.

**NOTE:** CERTAIN SMALL SITES MAY REQUIRE MORE TIME PER VISIT TO MAINTAIN THAN A "TYPICAL" SMALL SITE. BELOW IS A LIST OF SUCH SMALL SITES. PLEASE REVIEW ALL SITES CAREFULLY.

**VII. NOTES FOR VARIOUS LOCATIONS**

Important notes to be taken into consideration for various small sites.

Beaver Ruin
Need to cut and maintain path to diversion boxes behind station.
Crooked Creek
Detention ponds are to be mowed at each visit as those are sodded and can be maintained by the same mowers that maintain the rest of those grounds.

Dekalb Booster
Need to cut wide around station and join cut with rest of area.
Hog Mtn #1
Need to cut the bank beside station and in front, road to fence.
Knob Hill Tank
This location is like a park; it needs to be cut from road edge in to site, entire corner lot needs to be cut.
Lanier Filter Plant
The area between the asphalt road atop the reservoir and the water's edge of the raw water reservoir is NOT part of the contract. All slopes surrounding the reservoir are part of the contract.
Lower Big Haynes
All inside fence needs to be maintained, as well as keeping growth off fence. Entire grounds inside fence needs to be maintained, as well as fence line.
NBC (No Business Creek)
Entire grounds inside fence needs to be maintained, as well as fence line.
Northfork Peachtree Creek
Need to cut and maintain path behind station to manhole
Sheffield (meter site)
Need to keep sprayed inside to keep growth off fence.
Yellow River
Detention ponds are to be mowed at each visit as those are sodded and can be maintained by the same mowers that maintain the rest of those grounds.
Archer HS, Duncan Creek Elementary, East Rock Quarry, Hebron Church, Independence, Lawrenceville (meter), Level Creek, Norris Lake, N. Gwinnett MS, NBC, Patterson
All have long driveways.
Alcovy River, Brooks Rd, Bogan Rd T&B (tanks & booster), Dacula Rd, Grayson New Hope T&B, Hog Mtn #1, Lanier Mtn T&B, Lanier Head Chamber, LBH, Norcross T&B, Northfork Peachtree Creek, Rock Quarry T&B, Rockbridge T&B, Shoal Creek Raw Water, Suwanee Creek, Tunnel Shaft (both)
Because of the large footprints and public perception of these locations, these sites need to be cut from road edge to fence. Some will need to be the width of the site from the road to the facility location, while others can be just a wide apron from the road to the facility. All sites are currently maintained as should be, so to follow the existing mowing layout would be how it should be quoted and maintained.
