<div align="center">

Addendum #1
BL044-24 Provision of a Fuel Management System

</div>

Please see below summation of questions/answers and clarifications for the above solicitation.

Q1: Would this also include a fuel card and bulk tank fuel?
A1: The County already uses WEX for fueling at non-County fuel sites. The County would like to track bulk fuel issued from our fuel truck if practicable.

Q2: When the County states 'Windows to IoT Enterprise LTSC 2021 or higher' does the County mean 'Windows 10 IoT Enterprise LTSC 2021 or higher'?
A2: Yes, Windows 10 IoT Enterprise LTSC 2021 or higher. The desktop version must be Windows 11.

Q3: The scope states "The system should also allow recording of the dispensing from mobile fuel trucks and auxiliary fuel tanks." Will there be a line item on the bid schedule for the mobile fuel controller?
A3: Please bid under additional items as a separate line on the attached revised bid schedule attached below.

Q4: Will there be a line item on the bid schedule for the automotive information modules? If so, will the quantity desired be specified.
A4: Please bid as an additional item per each using 3,000 as the base quantity on the attached revised bid schedule below.

Q5: What data integration expectation is with your Fleet Maintenance Software, M5 Asset Works?
A5: All transaction data should flow into AssetWorks, including user, vehicle, gallons, and odometer reading. All asset information from AssetWorks should be used to track transactions and validate vehicles/users.

Q6: Is the County using bio/ren diesel, EV, hydrogen, CNG/RNG today. Will there be an expectation to interface with those devices to capture fueling transactions.
A6: Currently just Ultra Low Sulfur Diesel (ULSD) #2, Diesel Exhaust Fluid, and Ethanol Content Gasoline(E10) are dispensed at County fuel sites. The County would like the system to have the ability to be able to interface with electric vehicle charging in the future.

Q7: Will the County be willing to share an asset list? The service provider has direct OEM integrations to capture Mileage and vehicle data for PM's that we can share.
A7: The County will provide the list after award.

Q8: Do the 3,000 assets currently have telematics devices? If so, who and which vehicles?
A8: The Department of Police uses Ford Pro (approximately 1,000 vehicles), several other departments have GeoTab.

Q9: Do non-vehicles require asset trackers if they have fuel?
A9: Non-vehicle assets are fueled via a bucket account.

Q10: How is the County tracking GHG emissions and tracking across their vehicle and assets today?
A10: N/A

Q11: Would it be possible to quote new dispensers upgrades in our bid response?
A11: No, that is outside the scope of this project.

Q12: Do any cross department or third-party entities whether public or private have access to fueling? How is this handled and what are the requirements for authorization, reporting and billing?

A12: Yes, the County has agreements with various local government entities that allows them to fuel. They are set up as customers in the Fuel Management system, have fuel fobs, and are invoiced based on transactions monthly.
